Professional experience

PORTCHAIN Portchain

SENIOR SOFTWARE ENGINEER

Copenhagen, Denmark

2025 - Present

Implemented integrations for terminals to expand the Portchain network. Modernized frontend tests to follow best practices. Introduced Dependabot and resolved 100+ security vulnerabilities. Improved database performance and reduced load of pages by up to 50%. Migrated services to GCP using Terraform. Participated in hiring process for multiple engineers.

Hiring Meeting moderation GCP Terraform

Carta

SENIOR SOFTWARE ENGINEER

Copenhagen, Denmark

2022 - 2025

I enabled better sales offering and transparent management of billing for customers by revamping billing in a cross-functional teamwork, increased product demand by creating a tool for fundraising founders, delivered high-impact features despite tight deadlines, implemented in-app workflows increasing revenue for additional paid service by 300%, provided affordable currency exchange rate solution for 200+ currencies, enhanced UX and DX of modal component and improved product reliability by automating link validation and adding data integrity checks. Presented upcoming features to both company-wide and small stakeholder groups, tailoring the presentation accordingly. Collaborated with and on solutions with designers and product managers. Communicated clear and critical feedback in code reviews.

Capdesk Capdesk (Acquired by Carta)

JUNIOR SOFTWARE ENGINEER

Copenhagen, Denmark

2020 - 2022

I coached a new engineer and a designer, saved time for an engineering lead by automating app release announcements in Slack, improved copy quality through automated grammar and spellchecking using LanguageTool via GitHub Actions and, by adding OpenAPI, laid the foundation for future improvements like automated TypeScript type generation. Spearheaded multiple improvements to internal processes. Demonstrated eagerness to learn and improve from my colleagues and critical feedback from 1:1s and performance reviews.
